(March 29, 2016)

On December 22, 2015, Energy Resources USA, Inc. (Energy Resources) filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Taylorsville Lake Dam Hydroelectric Project (Taylorsville Project or project) to be located at the U.S. Army Corps of Engineers' Taylorsville Lake Dam on the Salt River in Spencer County, Kentucky. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a control structure with one spill gate; (2) one 8-foot-diameter, 120-foot-long penstock with a butterfly valve; (3) a bifurcation structure; (4) two 5.5-foot-diameter, 32-foot-long penstocks; (5) a powerhouse containing two generating units with a total capacity of 3 megawatts; (6) a 90-foot-long, 60-foot-wide tailrace; (7) a substation; and (8) a 2.5-mile-long, 69 kV transmission line. The proposed project would have an estimated average annual generation of 9,500 megawatt-hours, and operate as directed by the Corps.
